

Overall Morningstar Rating™ as of 3.31.17 among 396 funds in the World Allocation category. See full details of rating calculation on page 2.

Investment Objective

The Leuthold Global Fund seeks capital appreciation and income while maintaining prudence in terms of managing exposure to risk. The investment guidelines of the Fund follow a 30%-70% Equity Exposure and 30%-70% Fixed Income Exposure. A minimum 40% of assets is invested in foreign securities.

Fund Information

Symbol (Retail/Inst.) GLBLX / GLBIX
 Inception (Retail/Inst.) 7.1.08 / 4.30.08
 Cusip (Retail/Inst.) 527289888 / 527289870
 Initial Inv. (Retail/Inst.) \$10,000 / \$1MM
 Net Assets \$110 million
 Portfolio Managers

Estimated Return Statistics⁵

	FUND	MSCI ACWI
Alpha	0.11	
Beta	0.64	
R-Squared	87.91	
Standard Dev. (annualized)	11.76	17.32
Sharpe Ratio	0.37	0.25

First Quarter Performance Positives

- None of the overall allocations contributed a net loss. The Fund's long-stock exposure provided the bulk of the gain.
- Commodity-oriented equity industry groups performed well (Commodity Chemicals and Steel holdings); the same goes for our EM-focused groups (Emerging Diversified Banks and Emerging Electric Utilities). Each turned in a double-digit total return gain.
- Developed Market Sovereign Debt, the largest fixed income allocation, provided over 30 bps to overall return.

First Quarter Performance Detractors

- Underexposure and stock selection both hurt within our Information Technology equity positions. No exposure to the Health Care sector was also a negative.
- EM Sovereign Debt and MBS Bond Fund holdings were essentially flat.

Growth Of \$10,000 Since Inception²

Leuthold Global Fund Average Annual Total Returns as of March 31, 2017⁴

	GLBLX	GLBIX	MSCI ACWI ³	Barclays Global Aggregate ³	MSTAR World Allocation ³
March 2017	0.43%	0.42%	1.29%	0.16%	-0.79%
Q1 2017	4.91	4.97	7.05	1.76	2.58
1-Year	5.42	5.66	15.69	-1.90	7.43
3-Year	1.49	1.70	5.65	-0.39	1.26
5-Year	5.28	5.52	8.97	0.38	3.40

Since Inception (GLBIX) ⁴	NA	4.59	4.57	2.33	2.04

*Returns for periods less than 1-year are not annualized. Per Prospectus dated 1.31.17 and supplemented 2.15.17, excluding dividends on short positions and acquired fund fees, annual net operating expenses for GLBLX/GLBIX were 1.31%/1.16%; gross operating expenses including dividends on short positions and acquired fund fees were 1.68%/1.43%. There were no fee waivers or expense reimbursements.

Performance data shown represents past performance and is no guarantee of future results. Investment return and principal will fluctuate so shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. For performance current to the most recent month-end, visit LeutholdFunds.com or call 800-273-6886.

1 Non-U.S. Equities and Foreign Bonds have additional risks, including but not limited to: higher volatility, political instability, and changes in currency rates. For additional information, please see the Prospectus. 2 Performance through quarter end. Chart assumes initial gross investment of \$10,000 made on 4/30/08 in GLBLX. Returns include reinvestment of dividends, but do not reflect deduction of taxes one would pay on distributions or redemption of shares. The Fund's past performance is not necessarily an indication of future performance. 3 MSCI ACWI is designed to measure equity market performance of Developed and Emerging Markets. Barclays Global Aggregate provides a broad based measure of global investment grade fixed-rate debt markets. MSTAR World Allocation Average measures performance of funds in the Morningstar World Allocation category. These indexes cannot be invested in directly. Performance return figures are historical and reflect the change in share price, reinvested distributions, change in net asset value, and capital gains distributions, if any. 4 GLBLX inception date 7.1.08; minimum investment \$10,000 or \$1,000 for an IRA. GLBIX inception date 4.30.08; minimum investment for all accounts is \$1 million. 5 See next page for definitions of return statistics.

Investors should consider the investment objectives, risks, charges and expenses of the investment company carefully before investing. adviser to Leuthold Funds

¹ MSCI ACWI is designed to measure the equity market performance of Developed and Emerging Markets. ² "Median Market Cap" is the median total dollar value of all outstanding shares computed as shares times current market price; "Wtd. Median P/E" is the weighted median of the current stock price divided by trailing annual earnings per share or expected annual earnings per share; "Price/Cash Flow" is calculated by dividing the share price by the cash flow per share; "Price/Book" compares a stock's market value to the value of total assets less total liabilities (book value); "Price/Sales" is determined by dividing current stock price by revenue per share; "ROA" is Return on Assets which is calculated by dividing net income for the past 12 months by total average assets; "ROE" is Return on Equity which is calculated by dividing net income for the past 12 months by common stockholder equity; "Operating Margin" is calculated by dividing operating income by net sales; "LT Debt/Capital" is calculated by dividing long-term debt by the sum of long-term debt, preferred stock and common stockholder's equity.

Standard Deviation Chart: Source FactSet Research Systems as of quarter-end. **Estimated Return Statistics (p.1):** Calculated by FactSet Research Systems as of quarter-end, return statistics use monthly total returns calculated since inception against the benchmark cited. "Standard Deviation" measures historical volatility; "R-squared" measures fund's performance correlation (0=no correlation, 100=perfect correlation); "Alpha" measures risk adjusted performance; higher alpha indicates better performance than expected given its beta; "Beta" measures volatility; beta <1, fund is less volatile and beta >1 indicates fund is more volatile; "Sharpe Ratio" measures risk vs. reward (higher ratio = better risk-adjusted performance).

Risks: Short Selling Risk—short sales involve selling a security in anticipation that the price will decline. Fund will suffer a loss if the value of the security rises rather than falls. In theory, short selling could result in unlimited loss. Foreign Securities Risk—foreign companies may be less liquid and more volatile than U.S. securities and may involve risks such as fluctuations in currency rates, differences in financial standards, and instability of governments and economies. Credit Risk—issuers of debt securities may not be able to make interest or principal payments and/or could suffer adverse changes in financial condition that would lower the credit quality, leading to greater price volatility. Asset Allocation Risk—Adviser may not correctly anticipate the relative returns and risks of the asset classes in which the Fund invests.

Morningstar Ratings™: Overall Rating derived from a weighted average of the 3-, 5-, and 10-year (if applicable) ratings. Within the World Allocation category composed of open-end and exchange-traded funds, for the 3-, 5-, and 10-year periods, respectively, GLBLX/GLBIX rated 3, 3, and NA stars among 396, 335, and NA funds. For funds with at least 3 years of history, Morningstar calculates a risk-adjusted return score that accounts for variation in monthly performance, placing more emphasis on downward variations and rewarding consistency. The top 10% of funds in each category receive 5 stars, next 22.5% 4 stars, next 35% 3 stars, next 22.5% 2 stars, and bottom 10% 1 star. ©2017 Morningstar, Inc. All Rights Reserved.
