

Overall Morningstar Rating™ for LGIIX as of 12.31.17, among 720 funds in the World Large Stock category. See full details of rating calculation on page 2.

Investment Strategy¹

The Leuthold Global Industries Fund invests in common stocks and other equity securities from around the world, based on a disciplined, unemotional, and quantitative approach to concentrated equity group investments. Under normal conditions, at least 40% of assets will be invested in securities from non-U.S. markets.

Market Overview

The global equity bull market kept on churning higher throughout the fourth quarter as the tax overhaul drove domestic markets higher, while economic growth continued to drive gains in international markets. We're still bullish near to intermediate term but many economic indicators we track are so positive we fear the bulk of the gains are behind us. The MSCI ACWI didn't produce a single down month in 2017 and only two months had gains less than 1%. Amid that backdrop, the Global Industries Fund outpaced the MSCI ACWI during the fourth quarter and for the full year as well.

Fourth Quarter Performance Positives

- Homebuilding was the most additive group position during the fourth quarter, specifically domestic Homebuilders which have seen an uptick in growth prospects along with recent consolidation.
- Our global Airlines group rebounded from recent weakness, and stock selection within the Energy sector was productive.

Fourth Quarter Performance Detractors

- The value-oriented stock selection approach we employ hurt performance across multiple sectors as growth continued to outperform value.
- Selection within the Information Technology sector was the biggest drag on performance.

Leuthold Global Industries Fund Average Annual Total Returns as of December 31, 2017*

	LGINX	LGIIX	MSCI ACWI ²	Lipper Global Multi-Cap Value ²	MSTAR World Large Stock ²
December 2017	1.02%	1.06%	1.65%	1.49%	1.25%
Q4 2017	6.03	6.10	5.84	4.22	4.97
1-Year	24.66	25.02	24.62	19.37	23.98
3-Year	7.73	7.99	9.89	7.63	8.86
5-Year	12.24	12.52	11.40	10.18	10.56
Since Inception ³	10.82	11.11	10.82	9.83	8.99

*Returns for periods less than 1-year are not annualized. Per Prospectus dated 1.31.17, annual net operating expenses for LGINX and LGIIX, after expense reimbursement are 1.50% and 1.25% respectively; annual gross operating expenses before reimbursement are 2.35% and 2.10%, respectively. Adviser has contractually agreed to reimburse the Fund for ordinary operating expenses >1.50% (LGINX) and >1.25% (LGIIX), based on average assets and expenses of share classes combined. In any of the following three fiscal years, the Adviser may recover waived fees. Current contract runs through 11.09.17. See Prospectus for more detail.

Performance data shown represents past performance and is no guarantee of future results. Investment return and principal will fluctuate so shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than that shown. For performance current to the most recent month-end, visit LeutholdFunds.com or call 800-273-6886.

1 Non-U.S. Equities have additional risks, including but not limited to: higher volatility, political instability, and changes in currency rates. 2 MSCI ACWI is designed to measure equity market performance of Developed and Emerging Markets. Lipper Global Multi-Cap Value is composed of funds that invest in a variety of market capitalization ranges, and avoiding concentrating 75% of their equity assets in any one market cap range over an extended period of time. MSTAR World Large Stock Average measures performance of funds in the Morningstar World Large Stock category. These indexes cannot be invested in directly. Performance return figures are historical and reflect the change in share price, reinvested distributions, change in net asset value, and capital gains distributions, if any. 3 Inception date for each share class is 5.17.10. LGINX minimum investment \$10,000 or \$1,000 for an IRA; LGIIX minimum \$1 million for all accounts. 4 See next page for definitions of return statistics.

Investors should consider the investment objectives, risks, charges and expenses of the investment company carefully before investing. Leuthold Weeden Capital Management serves as adviser to Leuthold Funds

¹ MSCI ACWI is designed to measure equity market performance of Developed and Emerging Markets. ² "Median Market Cap" is median total dollar value of all outstanding shares computed as shares times current market price; "Wtd. Median P/E" is weighted median of current stock price divided by trailing annual earnings per share or expected annual EPS; "Price/Cash Flow" is share price divided by cash flow per share; "Price/Book" compares stock's market value to value of total assets less total liabilities (book value); "Price/Sales" is current stock price divided by revenue per share; "ROA" is Return on Assets, which is past 12-months' net income divided by total average assets; "ROE" is Return on Equity, which is past 12-months' net income divided by common stockholder equity; "Operating Margin" is operating income divided by net sales; "LT Debt/Capital" is long-term debt divided by the sum of long-term debt, preferred stock, and common stockholder's equity.

Standard Deviation Chart: Source FactSet Research Systems as of quarter-end. **Estimated Return Statistics (p. 1):** Source FactSet Research Systems as of quarter-end, return statistics use monthly total returns calculated since inception against the benchmark cited. "Standard Deviation" measures historical volatility; "R-squared" measures fund's performance correlation (0=no correlation, 100=perfect correlation); "Alpha" measures risk-adjusted performance: higher alpha indicates better performance than expected given its beta; "Beta" measures volatility: beta <1, fund is less volatile and beta >1 indicates fund is more volatile; "Sharpe Ratio" measures risk vs. reward (higher ratio=better risk-adjusted performance). **Risks:** Foreign Securities Risk- foreign companies may be less liquid and more volatile and may involve risks such as fluctuation in currency rate, differences in financial standards, and instability of governments/economies. High Portfolio Turnover Risk- annual portfolio turnover may exceed 100% resulting in more transaction costs such as brokerage commissions, mark-ups or mark-downs. This could result in increased taxes on realized gains. Quantitative Investment Approach Risk- although the Adviser continuously reviews and refines its strategy, there may be market conditions where the quantitative investment approach performs poorly. See the Prospectus for more details.

Morningstar Ratings™: Overall Rating derived from a weighted average of the performance associated with the 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% 3-year rating (for 36-59 months of total returns), 60% 5-year rating/40% 3-year rating (for 60-119 months of total returns), or 50% 10-year rating/30% 5-year rating/20% 3-year rating (for 120+ months of total returns). While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period has the greatest impact because it is included in all three rating periods. Within the World Large Stock category for the 3-, 5-, and 10-year periods, respectively, LGIX/LGIIX rated 2/3, 4/4, and NA stars, among 720, 589, and NA funds. The Morningstar Rating™ for funds/"star rating," is calculated for managed products with at least a 3-year history. Exchange-traded funds and open-end mutual funds are considered a single population for comparative purposes. Morningstar calculates a risk-adjusted return score that accounts for variation in monthly performance, placing more emphasis on downward variations and rewarding consistency. The top 10% of funds in each category receive 5 stars, next 22.5% 4 stars, next 35% 3 stars, next 22.5% 2 stars, and bottom 10% 1 star. ©2017 Morningstar, Inc. All Rights Reserved.
